

# Customizable Retail Solutions

Software tailored to create an advantage for your unique business.

## The E3 Difference

We believe in building relationships based upon personal connections with dedicated employees who are with you from the beginning and celebrating each key success.

### Composable Architecture

Intuitive solutions that integrate with your existing software saving you time and money.

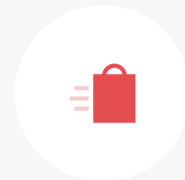

### Fully Customizable

Get exactly what you need to efficiently run and grow your business.

### Dedicated Expert Team

We provide a team of associates you know by name and partner's who understand your business.

### Speed - to - Market

Retail is evolving at a rapid pace. To remain relevant for your customers we are quick to bring new solutions to the market.

## Success Story

*"E3 Retail is an important partner for us as we work to put the customer at the core of every process and every decision. E3 Retail's Solutions were key to facilitating a positive experience for our customers. Using solid products together with incredibly knowledgeable teams produced a system that was simple and intuitive for our associates. E3 Retail brought both of these qualities to the table."*

**Senior Director of Retail IT**

# Everything you need in the one place

## POS Solution

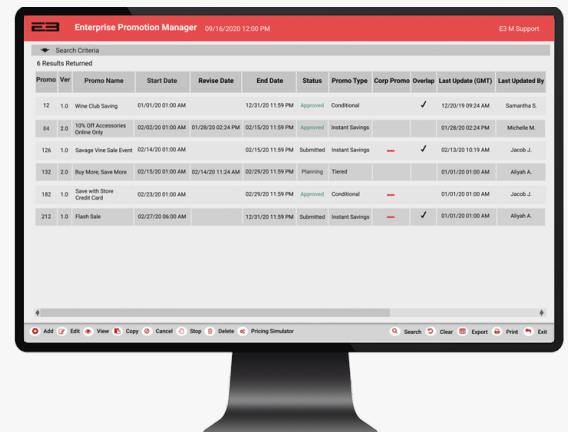

Created to manage the complexities of retail so you can focus on your most important asset – your customers.

- Sell more anywhere and on any device.
- Allow your customers to start their shopping journey in any digital channel and retrieve their baskets in-store to complete the purchase.
- Effortlessly manage your retail operations with tightly integrated back office features and reporting.
- Hassle-free returns allowing customers to purchase in any channel and return in-store.

## Pricing and Promotion Management

Easily create and manage Pricing & Promotions while increasing margin and enhancing your bottom-line.

- Effortlessly manage complex pricing and promotional offers.
- Simulate current and future prices to ensure accuracy of pricing.
- Provide consistent pricing across all customer touchpoints.
- Capture detailed data along with the sale to ensure you recoup all vendor market development funds.

## Guided Selling

Boost revenue by inviting customers to purchase additional or related items and/or services.

- Increase revenue by cross-selling products and/or services to complete your customer's purchase.
- Operational teams can easily configure workflows to enable selling products and services without requiring code changes.
